

Netanel Berkovits — Software Engineer

✉ netanel.berkovits@gmail.com ☎ 055-8822075 🌐 Personal Website [in](#) LinkedIn [in](#) GitHub

Professional Summary

Computer Science graduate (GPA: 87) with hands-on experience building **backend, full-stack, systems, and AI-powered applications**. Develops reliable APIs, client-server software, data-processing workflows, and database-backed products using **Python, C#, C++, Java, JavaScript, SQL, .NET, FastAPI, React, and Node.js**. Combines strong foundations in data structures, algorithms, and object-oriented design with practical cloud, database, and Docker experience. Motivated to contribute to real products, learn quickly, and solve meaningful engineering problems.

Technical Skills

</> Programming Languages

Python, C#, C++, C, Java, JavaScript, SQL, HTML, CSS

{ } Application Development

.NET 8, FastAPI, Node.js, React, REST APIs, Client-Server Architecture, Android

🔧 Engineering Foundations

Object-Oriented Design, Data Structures, Algorithms, Design Patterns, Multithreading, TCP/IP Sockets, Operating Systems

🗄 Data, Cloud & Tools

MongoDB, Redis, Azure, Docker, Git, OpenAI API, Auth0

Education

Bar-Ilan University

Bachelor of Science • GPA: 87

Computer Science

2022–2025

Built practical foundations in **software engineering, object-oriented programming, data structures, algorithms, operating systems, cybersecurity, programming languages, and machine learning** through hands-on coursework and projects.

Selected coursework: Projects Seminar (100), Software Engineering (100), Cybersecurity (97), Programming Languages (97), Computational Complexity (94), Object-Oriented Programming (91), Algorithms (90), Operating Systems (89), Machine Learning (85).

Selected Projects

AI-Powered Learning Assistant for ADHD and Dyslexia

- Built backend services with **C#, .NET 8, Python, and FastAPI**, integrating Auth0, Azure, and OpenAI APIs.
- Engineered a multi-stage data-cleaning, validation, analysis, and review pipeline using MongoDB, Redis, Docker, and Azure.

Multi-Algorithm KNN Classification Service

- Developed a **multithreaded C++11 client-server service** handling concurrent clients and classifying CSV datasets.
- Implemented TCP/IP communication, file transfer, validation, error handling, object-oriented design, and the Strategy pattern.

WhatsApp-Inspired Web and Android Chat Application

- Built web and Android chat applications using **JavaScript, React, Node.js, Java, REST APIs, MongoDB, and SQL**.

Breakout/Arkanoid Game - Java

- Developed a **Java 8+** arcade game with configurable levels, collision detection, scoring, and a modular object-oriented architecture.

Experience

IDF / COGAT — Economic Coordination & Liaison NCO

2019–2021

- Automated operational reporting, reducing production time by approximately **85%** - from more than two hours to 20 minutes - while improving data accuracy and consistency.
- Coordinated work across multidisciplinary teams and demonstrated initiative, accountability, communication, and problem-solving under pressure.
